

# I'D LOVE TO COME, BUT PARKING'S A NIGHTMARE!

## Who hasn't heard that before?

My goal and commitment for the mainland parking solution is to allow for **more freedom** in our comings and goings.

We should work to **unite** families, friends and services so that nobody is left behind.

Just because we live on the islands, doesn't mean we're prisoners or shouldn't have **access to mainland opportunities**.

## LIVING THE NIGHTMARE...

I recognise and share the pain we're all going through with the challenges of parking and using mainland transport. That's why working together for measurable outcomes will give us a better chance to get what we need.

### To ease our parking/transport nightmare I will:

- Do things **with** and **not to** our **community**.
- Form a **Parking & Transport Group** to develop practical strategies to improve mainland and island parking **AND** transport options.
- Vote **NO** to **paid parking** replacing free parking.
- **Decline** a Councillor **car** with **parking**. Instead, I'll use **public transport** and **car-share**, just like many island residents.

## WAKE-UP!

### When elected, I'll be pushing Council for:

1. **24/7 security patrols** and **rapid police response** to address the problem of crime and vandalism.
2. **Audit** of existing **car-park usage** to inform planning the **best way forward**.
3. Faster delivery of the **Weinam Creek Priority Development Area (PDA)** project, ensuring the **community-approved** precinct design:
  - ✓ Allocates and delivers **2200+ free car spaces**
  - ✓ Supports **future expansion**

- ✓ Provides extra **car-share spaces** that are leased-back to the provider
  - ✓ Takes **disability access and parking** into account
  - ✓ Expands the **Kiss-and-Drop** zone to allow drivers to safely drop **passengers and luggage**
  - ✓ Includes a **storage facility** for leaving **trolleys and baggage** unattended while parking
  - ✓ Provides **secure bicycle lockers** to encourage commuters to use alternative transport
  - ✓ **Disallows parking offsets** for commercial, professional or residential **developments**. They **MUST** provide **extra spaces**
  - ✓ **Improves** our **foreshore** environment
4. Continue to **lobby State government** for more **Park-and-Ride** spaces and subsidised barge-fares.
  5. **Secure long-term parking** facility that is **affordable** to all SMBI and Redland Bay residents.
  6. **Better shopping experiences** with a reliable **shopper-bus** designed for commuters with trolleys, mobility aids and pets, which runs from the ferry to **Redland Bay** and **Victoria Point** shops.
  7. **Walking and cycleways** that provide a **safe** and pleasant **connection** between where people live and the community and retail spaces they access.
  8. New **deepwater trailerboat facility**, South of Weinam Creek, to improve access to the waterways and **relieve parking demand**.
